PROFESSIONAL SUMMARY

Seeking an entry-level Python Developer role to develop and maintain Python-based applications, backend services, and data-driven solutions. Interested in applying Python, SQL, Flask, FastAPI, REST APIs, and database concepts to build reliable and scalable software solutions.

EDUCATION

Rajamahendri Institute of Engineering and Technology (JNTUK)	2022–2026
Bachelor of Technology in Computer Science and Engineering	CGPA: 8.74
Vagdevi Junior College	2020–2022
Intermediate (MPC)	91.3%
S.L.N Z.P.P High School	2019–2020
Secondary School Certificate (SSC)	100%

SKILLS

Programming	: Python
Databases	: SQL, MySQL, PostgreSQL
Web Technologies	: HTML, CSS, JavaScript, Flask
Machine Learning	: TensorFlow, NLP, Scikit-learn, Pandas, NumPy
Cloud	: AWS (EC2, IAM, Load Balancer)
DevOps	: Jenkins (CI/CD)
Tools	: Git, GitHub, VS Code, Power BI, MS Excel

EXPERIENCE & INTERNSHIPS

AI/ML Virtual Intern Infosys Springboard	Feb 2026 – Apr 2026
- Engineered an AI-powered mobile stock screener and advisory platform that analyzed 500+ financial records using machine learning models. - Applied data preprocessing and feature engineering techniques on financial datasets to improve model readiness and prediction reliability.	
Deep Learning Intern Data Valley	2025
- Constructed TensorFlow-based deep learning models, improving prediction accuracy by 12%. - Enhanced text classification using preprocessing and sequence vectorization techniques.	
Data Science Trainee SkillDzire	2025
Performed end-to-end data analytics and machine learning workflows on datasets containing over 10,000 records.	
Frontend Web Development Intern Amaravathi Software Institute Pvt. Ltd.	2024
Created responsive web interfaces using HTML, CSS, and JavaScript, improving page load performance by 15%.	

PROJECTS

Fake Product Detection Using QR Codes and Blockchain
- Designed a blockchain-based product authentication system using QR codes to improve counterfeit detection and traceability. - Integrated smart contract logic to securely store and verify product records, reducing the risk of data tampering.
AI-Powered Stock Screener and Advisory Platform
- Developed an AI-powered stock screener using Fast API, Python, and PostgreSQL for natural language-based stock screening. - Built a 5-stage backend pipeline for DSL generation, validation, SQL compilation, and query execution. - Implemented 3 core modules with secure SQL generation and structured error handling.
Twitter Sentiment Analysis (Deep Learning)
Trained a sentiment analysis model using Python and TensorFlow achieving 92% accuracy in classifying customer reviews as positive, negative, or neutral, enabling targeted marketing campaigns.

CERTIFICATIONS & ACHIEVEMENTS

- Completed 6+ certifications in Machine Learning and Cloud Computing through NPTEL, Cisco Networking Academy, and Infosys Springboard.
- Completed four technical internships and participated in multiple coding contests and workshops, strengthening practical software engineering and machine learning skills.
